The screenshot shows the Google Earth Engine web interface. At the top, the 'Google Earth Engine' logo is on the left, and navigation links for 'FAQ', 'TIMELAPSE', 'DATASETS', 'CASE STUDIES', 'PLATFORM', 'BLOG', and 'SIGN UP' are on the right. Below the navigation bar is a large satellite map of a coastal region, identified as Dalian, China, with the city name in English and Chinese characters. A search bar with the placeholder 'Search for places...' and a magnifying glass icon is in the top left of the map area. On the left side of the map, there are navigation controls: a compass, a zoom-in (+) button, a zoom-out (-) button, and a scale bar showing '5 km' and '2 mi'. At the bottom of the map, there is a 'Timelapse' timeline. It features a play button icon, a slider with the year '1984' selected, and a 'Medium' resolution dropdown. The timeline ends with '2016' and a question mark icon. Below the main map, a row of small thumbnail images shows the progression of the satellite imagery over time. In the bottom right corner, there is a 'Share or Embed' button.

Timelapse

Timelapse is a global, zoomable video that lets you see how the Earth has changed over the past 32 years. It is made from 33 cloud-free annual mosaics, one for each year from 1984 to 2016, which are made interactively explorable by [Carnegie Mellon University CREATE Lab's](#) Time Machine library, a technology for creating and
